FACULTY CONTRIBUTION PORTAL

ABSTRACT:

Faculty Contribution Portal (FCP) is a web application to track, evaluate, and recognize the faculty's contributions. It is a single system where the faculty can document their intellectual activity. For instance, important conferences, Workshops, research projects, awards and Recognitions research publications, conference, presentations, classroom innovations, service commitments, and students data in the form of students internship data like faculties gather and monitor. The faculty and administration people can view the data. And they can retrieve the data based on some features like branch ,participant name,Company name.The main objective of FCP in the submission and review process is to automate the process with minimal human intervention. In this process, the FCP minimizes administrative burden, provides more transparency, and faculty assessment and promotion can be done by using data. FCP mainly provides user identification, profile management, document uploading and storage, automated notification, and customized reporting tools. The FCP can give a good experience in general for the faculty and institutional effectiveness. The FCP is expected to use innovative technology like user-friendly interface and fast workflow.

TECHNOLOGIES USED:

Frontend Technologies:Html,Css,Javascript

Backend Technologies: Node.js

Database:Mongodb
